ABOUT ME

Full Stack JavaScript Developer with 3+ years of experience building scalable web and mobile applications using React, Next.js, and Node.js.

Currently leading development at agriNews, owning the full product lifecycle from architecture design to production deployment.

Experienced in building real-world products with a strong focus on performance, scalability, and business impact. Proven track record improving system performance, handling high-traffic APIs, and delivering production-ready applications.

Looking to grow into a senior engineering role contributing to impactful and scalable products.

EXPERIENCE

Lead Full Stack JavaScript Developer

Barcelona, Spain

Grupo de comunicación agriNews SL

2024 - Present

- Led development of cross-platform mobile apps (iOS & Android) using React Native, delivering production-ready applications with authentication and push notifications.
- Owned end-to-end product lifecycle: architecture design, development, and deployment.
- Developed web applications using React, Next.js, and Node.js, optimizing performance with lazy loading and code splitting.
- Designed scalable REST APIs with Node.js and Express, reducing response times by 30% and handling 1,000+ requests/min.
- Collaborated with stakeholders to align technical decisions with business goals.

Full Stack Developer (React JS – Node JS)

Buenos Aires, Argentina

Tecnosapiens

2022 - 2024

- Built scalable REST APIs using Node.js and Express with JWT authentication and security best practices.
- Developed frontend applications with React and Next.js, applying SSR and performance optimizations.
- Contributed to frontend architecture design with a focus on scalability and maintainability.

Front-End Developer (React JS)

Córdoba, Argentina

Escribanía Bustamante Zambon

2022

- Built responsive and accessible interfaces using React and Material UI.
- Collaborated in agile environments delivering features aligned with client requirements.

SKILLS

Technical Skills: Frontend: React.js, Next.js, React Native | Backend: Node.js, Express.js, REST APIs | Databases: PostgreSQL, MongoDB, SQL | Tools: Git, CI/CD, Firebase, Vercel | Concepts: Scalable Architecture, Performance Optimization, API Design

PROJECTS

Timpzo – SaaS Booking Platform

2025 - Present

Live: <https://timpzo.com>

- Designed and developed a scalable SaaS platform for appointment and booking management targeting service-based businesses.
- Built a multi-tenant architecture supporting multiple organizations with role-based access and isolated data
- Developed full-stack application using Next.js, Node.js, and PostgreSQL (Neon)
- Implemented booking system, availability scheduling, and service management logic
